GLOSAIR™ SYSTEM

OXY'PHARM GLOSAIR™ SYSTEM

Consistently protects your environment against pathogens.

The Oxy'Pharm **GLOSAIR SYSTEM** is an advanced technology of airborne disinfection, using hydrogen peroxide.

- New device built around a **turbine and 2 venturi** : the product is diffused in its gaseous form, therefore avoiding corrosion
- No more compressor
- Increased volume capacity: treats up to 2000 m³
- More intuitive: simplified interface
- More flexible: several programs available, to meet all treatment needs.
- Integrated ventilation system: enables an even better saturation of the treated volume.
- For use with Oxy'Pharm **GLOSAIR™ 400 Cartridge.**
