

J

J-CTO SCORE

J-CTO skjemaet er et mye brukt verktøy (skjema) som benyttes til å vurdere vanskelighetsgraden ved en planlagt CTO-prosedyre. Hvert av de fem punktene gis verdien 0 eller 1 - før de fem punktene summeres. Høyere totalsum betyr mer utfordrende prosedyre. Det finnes en sammenheng mellom høyere totalsum, synkende suksessrate og lengre prosedyretid.

Variables and definitions		Version 1.0	
Tapered 	Blunt 	Entry shape ☐ Tapered (0) ☐ Blunt (1)	point
Calcification 		Calcification ☐ Absence (0) ☐ Presence (1)	point
Bending > 45degrees 		Bending > 45° ☐ Absence (0) ☐ Presence (1)	point
Occlusion length 		Occl.Length ☐ <20mm (0) ☐ ≥20mm (1)	point
Re-try lesion Is this Re-try (2 nd attempt) lesion ? (previously attempted but failed)		Re-try lesion ☐ No (0) ☐ Yes (1)	point
Category of difficulty (total point) ☐ easy (0) ☐ Intermediate (1) ☐ difficult (2) ☐ very difficult (≥3)		Total points
